

Forever Turning

BY ARTISANS OF THE VALLEY

*Every tree encapsulates natural beauty within the grains of its soul;
we carefully shave away layers until we discover and sculpt the perfect form to
represent the vibrancy of its life.*

Our hand turned bowls and vessels are available in yearly limited releases. Each is unique; we extract the best form from a blank, enhancing the natural variations in texture and color with a tung oil finish. We use a variety of domestic and exotic wood harvesting from sustainable sources, gathering fire breaks and storm falls, and selecting from reclaimed lumber. We strive for differences, imperfection, and variety leveraging the irregular and distinctive characteristics. Our turnings are signed by master craftsman Eric M. Saperstein or Michael Pietras including date and the material with our annual numbering series; a select few are signed by both artists.

Our studio hours are by appointment. Please call ahead!
